- English (Intermediate)

Professional Summary

Frontend developer with 3 years of experience building production websites and dashboards with Next.js and React, plus 6 years teaching programming. Looking for an internship to grow into a product engineer.

Work Experience

Frontend Developer (Full-time) 2023 – 2024
Webket | Remote

- Built production websites and web systems with Next.js for clients in Egypt and Saudi Arabia.
- Thiraa Real Estate (Saudi Arabia): Built the admin dashboard (sales, projects, website management) and the public website, thiraa.sa.
- agreNoba: Built the frontend of a land-protection violation-reporting system for the Ministry of Agriculture.
- mofassal.com: Built the landing page for a Quran circles management platform.
- Webket and Doctorket: Built the company website and Doctorket, an internal product owned by Webket. = doctorket.net

Tech Lead (Volunteer) 2024
Bytix | Remote

- Khalid Ibn Al-Walid Quran Competition (React, Supabase): led a student team to deliver the frontend in two weeks and built the backend.
- Tested about 3,000 students and handled 20,000+ data requests.
- Designed exam logic: no repeated exam model per 20 students, and no repeated question, topic, or surah per student.

Frontend Developer (Freelance)
Bytix Programming Academy

- Built the academy's website.

Programming Instructor (Part-time) 2021 – Present
Koodak, Skidy Rain, Be School

- Taught Python, HTML, CSS, JavaScript, React, and Next.js to around 500 students aged 8 to 25.

Education

B.Sc. in Agricultural Engineering 2025
Al-Azhar University
